CONTENTS

NUMBER 1

J. Gebhart	1	Smoluchowski award: 1997 Recipient Dr. Markku T. Kulmala
S. H. Park, K. W. Lee, E. Otto and H. Fissan	3	The log-normal size distribution theory of Brownian aerosol coagulation for the entire particle size range: Part I—Analytical solution using the harmonic mean coagulation kernel
E. Otto, H. Fissan, S. H. Park and K. W. Lee	17	The log-normal size distribution theory of Brownian aerosol coagulation for the entire particle size range–II. Analytical solution using Dahneke's coagulation kernel
V. Dimitrov and A. Bar-Nun	35	A model of energy-dependent agglomeration of hydrocarbon aerosol particles and implication to Titan's aerosols
F. Frishman, M. Hussainov, A. Kartushinsky and Ü. Rudi	51	Distribution characteristics of the mass concentration of coarse solid particles in a two-phase turbulent jet
A. V. Filippov, M. W. Markus and P. Roth	71	In-situ characterization of ultrafine particles by laser-induced incandescence: sizing and particle structure determination
E. Le Bronec, A. Renoux, D. Boulaud and M. Pourprix	89	Effect of gravity in differential mobility analysers. A new method to determine the density and mass of aerosol particles
W. H. Finlay and K. W. Stapleton	105	Undersizing of droplets from a vented nebulizer caused by aerosol heating during transit through an Anderson impactor
J. Keskinen, M. Marjamäki, A. Virtanen, T. Mäkelä and R. Hillamo	111	Electrical calibration method for cascade impactors
A. M. Gañán-Calvo and A. Barrero	117	A novel pneumatic technique to generate steady capillary microjets
		Technical Note
M. S. Ingber, D. E. Womble, A. S. Geller, D. J. Rader and L. A. Mondy	127	Boundary element method calculations of the mobility of nonspherical particles—3. Parallel implementation for long chains

NUMBER 2

H. Arstila, P. Korhonen and M. Kulmala	131	Ternary nucleation: kinetics and application to water–ammonia–hydrochloric acid system
P. Tekasakul, R. V. Tompson and S. K. Loyalka	139	Evaporation from a nonspherical aerosol particle situated in an absorbing gas

M. Kostoglou and A. J. Karabelas 157 On the self-similarity of the aggregation–fragmentation equilibrium particle size distribution

S. J. Dunnett 163 An analytical investigation into the nature of the airflow near a spherical bluff body with suction

I. M. Katz, B. M. Davis and T. B. Martonen 173 A numerical study of particle motion within the human larynx and trachea

I. Balásházy, W. Hofmann and T. Heistracher 185 Computation of local enhancement factors for the quantification of particle deposition patterns in airway bifurcations

G. Tymen, D. Kerouanton, C. Huet and D. Boulaud 205 An annular diffusion channel equipped with a track detector film for long-term measurements of activity concentration and size distribution of nanometer ^{218}Po particles

M. Kasper, K. Sattler, K. Siegmann, U. Matter and H. C. Siegmann 217 The influence of fuel additives on the formation of carbon during combustion

R. C. Brown and D. Wake 227 Loading filters with monodisperse aerosols: macroscopic treatment

D. Thomas, P. Contal, V. Renaudin, P. Penicot, D. Leclerc and J. Vendel 235 Modelling pressure drop in HEPA filters during dynamic filtration

T. A. Pakkanen, R. E. Hillamo, M. Aurela, H. V. Andersen, L. Grundahl, M. Ferm, K. Persson, V. Karlsson, A. Reissell, O. Røyset, I. Fløisand, P. Oyola and T. Ganko 247 Nordic intercomparison for measurement of major atmospheric nitrogen species

NUMBER 3

Y. S. Djikaev, F. M. Kuni and A. P. Grinin 265 Kinetic theory of nonisothermal binary nucleation: the stage of thermal relaxation

D. Bhani and A. K. Ray 279 *In situ* measurement of photochemical reactions in microdroplets

M. Anderson, M. Svartengren and P. Camner 289 Human tracheobronchial deposition and effect of a histamine aerosol inhaled by extremely slow inhalations

P. Gao, H. K. Dillon, J. Baker and K. Oestenstad 299 Numerical prediction of the performance of a manifold sampler with a circular slit inlet in turbulent flow

C.-J. Tsai, H.-G. Shiau, K.-C. Lin and T.-S. Shih 313 Effect of deposited particles and particle charge on the penetration of small sampling cyclones

C.-L. Chang and H. Bai 325 An experimental study on the performance of a single discharge wire-plate electrostatic precipitator with back corona

M. Shimada, K. Okuyama, Y. Inoue, M. Adachi and T. Fujii — 341 Removal of airborne particles by a device using UV/photoelectron method under reduced pressure conditions

L. Pirjola — 355 Effects of the increased UV radiation and biogenic VOC emissions on ultrafine sulphate aerosol formation

I. Borbély-Kiss, E. Koltay, G. Y. Szabó, L. Bozó and K. Tar — 369 Composition and sources of urban and rural atmospheric aerosol in eastern Hungary

Comment

K. W. Stapleton and W. H. Finlay — 393 On the paper "Estimation of the size distribution of aerosols produced by jet nebulizers as a function of time"

Discussion

G. A. Ferron and C. Roth — 397 Response to the comments by Stapleton and Finlay on the paper "Estimation of the size distribution of aerosols produced by jet nebulizers as a function of time"

Short Communication

401 Report on the 3rd meeting of the European Aerosol Assembly Working Group on nanoparticles in aerosols

Abstracts

403 Of lectures and information of the 11th Annual Meeting of the Israeli Association for Aerosol Research

NUMBER 4

M. Kandlikar and G. Ramachandran — 413 Inverse methods for analysing aerosol spectrometer measurements: a critical review

X. Li, P. F. Dunn and R. M. Brach — 439 Experimental and numerical studies on the normal impact of microspheres with surfaces

L. Mädler, W. Koch, F. Lange and K. Husemann — 451 *In situ* aerodynamic size classification of aerosols in the size range between 0.1 and 100 μm for dustiness tests and powder characterization

J. P. Mitchell, M. W. Nagel and Y. S. Cheng — 467 Use of the Aerosizer® aerodynamic particle size analyzer to characterize aerosols from pressurized metered-dose inhalers (pMDIs) for medication delivery

J. Thornburg, S. J. Cooper and D. Leith — 479 Counting efficiency of the API Aerosizer

W. von Hoyningen-Huene, K. Wenzel and S. Schienbein — 489 Radiative properties of desert dust and its effect on radiative balance

D. Katoshevski, A. Nenes and J. H. Seinfeld — 503 A study of processes that govern the maintenance of aerosols in the marine boundary layer

R. J. Robinson and C. P. Yu — 533 Coagulation of cigarette smoke particles

Technical Note

W. Birmili, F. Stratmann and A. Wiedensohler — 549 Design of a DMA-based size spectrometer for a large particle size range and stable operation

555 Book Review

NUMBER 5

557 Obituary

M. Pantani, M. Del Guasta, D. Guzzi and L. Stefanutti — 559 Polar stratospheric clouds of liquid aerosol: an experimental determination of mean size distribution

L. J. Willett, S. A. F. Hashim, R. V. Tompson and S. K. Loyalka — 569 Effect of surface heterogeneities on condensation on an aerosol particle

Y. S. Djikaev and J. Teichmann — 587 On the equilibrium distribution in the binary nucleation theory

B. K. Sapra, Y. S. Mayya and K. S. V. Nambi — 597 Radon progeny deposition studies in static and AC fields using a modified scintillation cell and its applications

R. J. Aitken, P. E. J. Baldwin, G. C. Beaumont, L. C. Kenny and A. D. Maynard — 613 Aerosol inhalability in low air movement environments

L. C. Kenny, R. J. Aitken, P. E. J. Baldwin, G. C. Beaumont and A. D. Maynard — 627 The sampling efficiency of personal inhalable aerosol samplers in low air movement environments

K. Gysels and R. Van Grieken — 639 Field evaluation of a wind tunnel–impactor system for sampling ambient aerosols

W. Hofmann, R. Bergmann and L. Koblinger — 651 Characterization of local particle deposition patterns in human and rat lungs by different morphometric parameters

669 Abstracts from the 13th French Aerosol Conference by ASFERA

677 Abstracts of the International Conference on Aerosol Technology and Environmental Measurement and Control

NUMBER 6

691 Editorial

C. Sioutas, M.-C. Chang, S. Kim, P. Koutrakis and S. T. Ferguson — 693 Design and experimental characterization of a PM_1 and a $PM_{2.5}$ personal sampler

C. G. Phillips and S. R. Kaye — 709 The influence of the viscous boundary layer on the critical Stokes number for particle impaction near a stagnation point

R. V. Mallina, A. S. Wexler and M. V. Johnston — 719 High-speed particle beam generation: simple focusing mechanisms

C. He and G. Ahmadi 739 Particle deposition in a nearly developed turbulent duct flow with electrophoresis

C. Venkataraman, S. Thomas and P. Kulkarni 759 Size distributions of polycyclic aromatic hydrocarbons—gas/particle partitioning to urban aerosols

J. Lyyränen, J. Jokiniemi, E. I. Kauppinen and J. Joutsensaari 771 Aerosol characterisation in medium-speed diesel engines operating with heavy fuel oils

S. Tsantilis, S. E. Pratsinis and V. Haas 785 Simulation of synthesis of palladium nanoparticles in a jet aerosol flow condenser

M.-D. Cheng, T. M. Nash and S. E. Kopetz 805 Retrieval of aerosol optical thickness by means of the least-median-squares robust algorithm

819 Smoluchowski Award: 1998 Recipients

821 News Items

ELECTRO-HYDRODYNAMIC ATOMIZATION

vii Editorial

R. P. A. Hartman, D. J. Brunner, D. M. A. Camelot, J. C. M. Marijnissen and B. Scarlett 823 Electrohydrodynamic atomization in the cone–jet mode physical modeling of the liquid cone and jet

L. T. Cherney 851 Electrohydrodynamics of electrified liquid menisci and emitted jets

A. M. Gañán-Calvo 863 The surface charge in electrospraying: its nature and its universal scaling laws

A. Jaworek and A. Krupa 873 Classification of the modes of EHD spraying

J. M. Lopez-Herrera, A. M. Gañán-Calvo and M. Perez-Saborid 895 One-dimensional simulation of the breakup of capillary jets of conducting liquids. Application to E.H.D. spraying

J. P. Borra, Y. Tombette and P. Ehouarn 913 Influence of electric field profile and polarity on the mode of EHDA related to electric discharge regimes

Th. Dülcks and R. Juraschek 927 Electrospray as an ionisation method for mass spectrometry

J. P. Borra, D. Camelot, K.-L. Chou, P. J. Kooyman, J. C. M. Marijnissen and B. Scarlett 945 Bipolar coagulation for powder production: micro-mixing inside droplets

C. H. Chen, M. H. J. Emond, E. M. Kelder, B. Meester and J. Schoonman — 959 Electrostatic sol–spray deposition of nano-structured ceramic thin films

Technical note

J. C. Almekinders and C. Jones — 969 Multiple jet electrohydrodynamic spraying and applications

973 Abstracts of the International Electrospray Workshop

NUMBER 8

979 Fuchs Memorial Award 1998

981 Obituary: William James (Jim) Megaw 1924–1998

D.-R. Chen, D. Y. H. Pui, G. W. Mulholland and M. Fernandez — 983 Design and testing of an aerosol/sheath inlet for high resolution measurements with a DMA

C. Sioutas, S. Kim and M. Chang — 1001 Development and evaluation of a prototype ultrafine particle concentrator

C.-J. Tsai, W.-S. Yang, W. W. Szymanski and H.-M. Chein — 1019 Particle transmission efficiency through the nozzle of the API Aerosizer™

W.-D. Griffiths and I. W. Stewart — 1029 Performance of bioaerosol samplers used by the UK biotechnology industry

M. Shapiro and S. Lekhtmakher — 1041 Measurement of aerosol effective transport coefficients in cylindrical tubes

H.-S. Tai, J. J. Lin and K. E. Noll — 1057 Characterization of atmospheric dry deposited particles at urban and non-urban locations

V.-M. Kerminen — 1069 Roles of SO_2 and secondary organics in the growth of nanometer particles in the lower atmosphere

L. Pirjola, M. Kulmala, M. Wilck, A. Bischoff, F. Stratmann and E. Otto — 1079 Formation of sulphuric acid aerosols and cloud condensation nuclei: an expression for significant nucleation and model comparison

V. Rizi and G. Visconti — 1095 Physical analogs and performance of a box model for composition and growth of H_2SO_4/H_2O and $HNO_3/H_2SO_4/H_2O$ aerosol in the stratosphere
